HPE and Runecast

HPE SimpliVity and Runecast Analyzer

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and Runecast are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Runecast is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Runecast has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

Runecast Analyzer automatically detects all known VMware SDDC™ issues to eliminate the break/fix cycle and laborious manual effort normally associated with management of VMware vSphere®, VMware vSAN™, NSX-V, and VMware Horizon® environments.

The fully on-premises solution continuously monitors more than 30,000 sources of industry information to proactively detect any latent issues, best practice deviations, or security noncompliance so they can be remediated before problems occur. It is also certified for VMware Cloud™ on AWS.

It includes automated VMware® hardware compatibility analysis and continuous security compliance auditing with full audit trails. Importantly, it provides the most comprehensive coverage of DISA STIG, PCI DSS, and HIPAA in VMware environments on the market.

With a fully comprehensive API and plug-ins for VMware vSphere® Web Client (VMware Horizon® FLEX™ and H5) and VMware vRealize® Orchestrator™, it deploys as a virtual appliance in just five minutes with no learning curve or internet required.

HPE SimpliVity 380 and 2600

The HPE SimpliVity solutions give IT leaders the agility and economics of the cloud with the control and governance of on-premises IT. They deliver powerhouse hyperconverged solutions capable of running some of the world's most efficient and resilient data centers. These solutions dramatically simplify IT by combining infrastructure and advanced data services for virtualized workloads onto the bestselling server platforms in the market.

HPE SimpliVity 380, available on HPE ProLiant DL380 servers, is a compact, scalable 2U rack-mounted building block that delivers server, storage, and storage networking services.

HPE SimpliVity 2600, available on HPE Apollo 2000 servers, is a compact solution optimized for edge and ROBO environments.

Company overview

About Runecast
Runecast is an innovative developer of automated proactive issue detection and remediation solutions for enterprise software applications and cloud environments.
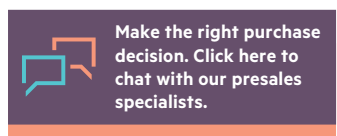

Runecast products automatically scan environments against a myriad of constantly updated industry knowledge sources to proactively detect and remediate latent issues and noncompliance before problems occur.

About Hewlett Packard Enterprise
Hewlett Packard Enterprise is a global technology leader focused on developing intelligent solutions that allow customers to capture, analyze, and act upon data seamlessly from edge to core to cloud.

HPE enables customers to accelerate business outcomes by driving new business models, creating new customer and employee experiences, and increasing operational efficiency today and into the future.
